Debug log 文件生成方法

第一步,打开 CST,在宏下拉菜单下选择 Registry Debug Flags,并且激活这个功能。

Run Macro Bio Models 3.0 Calculate Construct					
File	Get Customer-ID and Host-ID Import bas-file into history list Import Result Templates Open directory Global Library Path Registry Debug Flags				
🙈 Debug Logging	×				
Please switch on logging for CST STUDIO SUITE using this macro when your CST support engineer asks you to do so. The information stored in the log files can help CST to find setup or compatibility issues of CST STUDIO SUITE on your system. The log files can be found in the main installation folder of CST STUDIO SUITE (all files with the file extension ".log"). Please restart the CST frontend after activating/deactivating the logging such that the setting takes effect.					
Activate debug loggin Deactivate debug loggin DE Cancel	ging 激活debug后,记得先 关闭CST,然后重新打 开				

第二步,重新开打 CST 环境,然后运行完相应的操作后,可以在安装主目录下找到几个相应时间的 XXXX.log 文件,把他们给技术团队。

Program Files (x86) > CST STUDIO SUITE 2019

Name	Date modified	Туре	Size
DE.13324.00.log	5/24/2019 11:16 A	Text Document	35 KB
DS.15932.00.log	5/24/2019 11:16 A	Text Document	7 KB
Modeler.16664.00.log	5/24/2019 11:16 A	Text Document	16 KB

第三步,重复第一步的宏,关闭 debug 功能。
